

Information about POWer Project Homework

Now the children are in Key Stage 1 they will be receiving regular homework linked to the topics they are studying each term. The POWer Project approach has now been adopted throughout the schools from Years 1 to 6. This has been designed to give your child maximum creativity and enables them to choose a range of activities to complete. We hope this will allow them the freedom to use their creativity and imagination!

- The POWer Projects will last per half term, giving children sufficient time to complete them to their very best.
- At intervals during the half term, we will communicate with you through our weekly newsletter to ask for them to come in to school for 'progress checks' - do not worry if projects are not complete at this point!
- The projects count towards your child's homework and are not optional, they must be completed.
- There is not a page limit in this learning log and children are able to do their activities through writing, drawing, diagrams, photographs, art and craft or in any way they see fit, but please do not just copy material from the internet. It is much more beneficial for your child to write in their own words. This also makes it more personal to your child.
- You do not need to spend hours on the Learning log as most tasks are designed to give you the flexibility to select activities as you desire.
- *Please take pride in this book and have fun with the tasks! ☺*
